

## International Saarland Symposium on Glia 2016

Center for Integrative Physiology  
and Molecular Medicine  
CIPMM | Building 48, Homburg

**Friday, December 16, 2016**  
**time: 9.30 a.m. - 12.30 p.m.**  
**Auditorium**

### **The role of glial cells in epilepsy – novel targets of science and medicine –**

#### Invited Speakers

**Marco de Curtis**, *FINCB, Milan, Italy*  
**Epileptic seizures and brain damage**

**Christian Steinhäuser**, *University of Bonn, Germany*  
**Astrocytes and epilepsy**

**Nathalie Rouach**, *Collège de France, Paris, France*  
**Gap junction channels and neural network activity**

**Eleonora Aronica**, *AMC Amsterdam, Netherlands*  
**MicroRNAs and neuroinflammation**

**Vincenzo Crunelli**, *University of Cardiff, Wales, UK*  
**Neuron-glia interaction in absence epilepsy**

The symposium is organized by the  
**EU-GliaPhD Innovative Training Network**

*This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 722053.*
